CMS Release Notes

Overview		
This release includes issue fixes and new functionality		
New Features		
Sno	Department	Description
1	MIS	When report is to be downloaded, we have created a download centre which will help to download the report without slowing the application
Bugs/ Fixes		
1	Appointment Module	The continuous problem with appointment booking for applicants has been resolved.

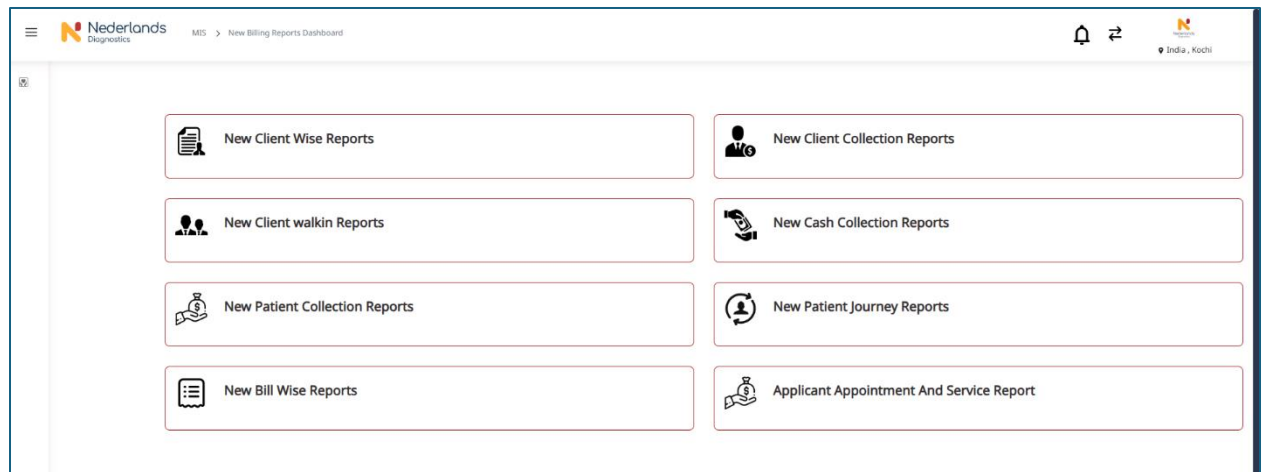

1. MIS (Report Download Centre)

Whenever a report is to be downloaded, the below process will be followed, it will allow you to download the report for a month or multiple months without affecting the application and the download will happen in another screen with a status either 'Success' or 'Failed'.

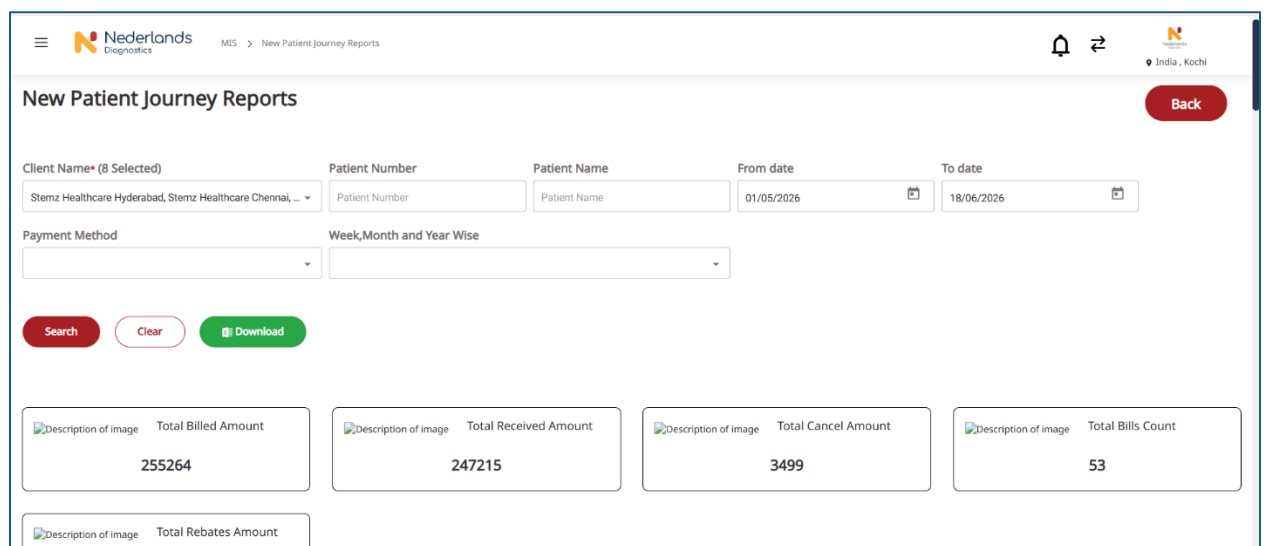

- Login into MIS role.
- Select New Reports Dashboard.

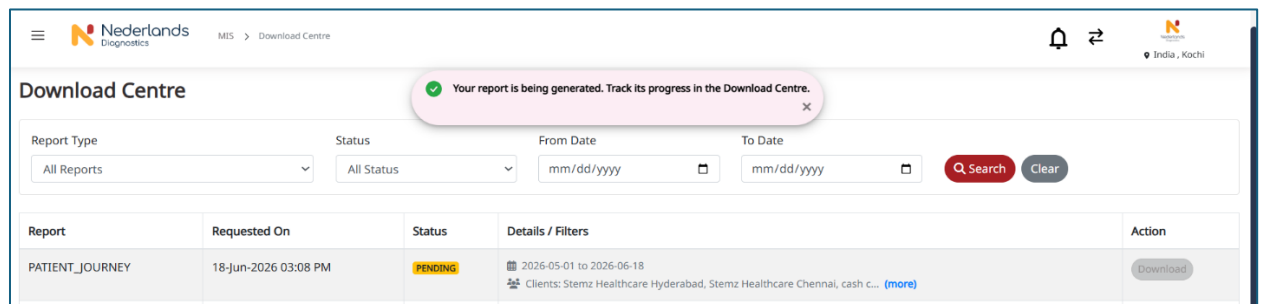

- Select any of the reports

- d. Select the filters as per requirement.
- e. Click on Search and then click on download after the data has been reflected.

- f. The screen will be diverted to Download Centre where it will reflect the report with the selected filters and show if the download is a success or failure.

- g. When the status reflects success, click on the download option to download the report.
